

Railway & Canal Historical Society

A Bibliography of the History of Inland Waterways, Railways and Road Transport in the British Isles, 2019

This annual bibliography of books, periodical articles and theses is shorter than would normally be the case since just when the compilers would have been venturing into libraries to check references and peruse periodicals, they were locked down. Rather than break continuity, however, we have decided to publish what we have, and shall hope to catch up in next year's offering. Under the circumstances, we should be even more than usually grateful to anyone who can offer additional detail or information.

We are grateful for assistance received from Peter Brown, Philip Brown, Paul Reynolds and Michael Thomson. We are also again indebted to the following societies who have generously provided complimentary copies of their journals: Cumbrian Railways Association, Great Eastern Railway Society, Great North of Scotland Railway Association, Industrial Railway Society, Midland Railway Society, North Eastern Railway Association, Subterranea Britannica and Welsh Railways Research Circle.

As usual "Ott. xxx" indicates an entry in *Ottley's Bibliography of British Railway History*.
